EDUCATION

Lovely Professional University

Bachelor of Technology – Computer Science and Engineering

Punjab, India

Aug 2022 – Present

TECHNICAL SKILLS

Programming Languages: C, C++, Java, JavaScript (ES6+), Python, Kotlin

Full Stack & Web Development: React.js, Node.js, Express.js, HTML5, CSS3, REST APIs

Cloud, DevOps & Automation: AWS, API Integration, Cloud Deployment Basics, Git, GitHub, Postman, Linux

Databases: MySQL, MongoDB, PostgreSQL

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile Methodology, Debugging & Testing, Technical Documentation

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Fast Learning

PROJECTS

CropDesk – Full Stack Agricultural Marketplace Platform | [GitHub](#)

Nov 2025 – Feb 2026

- Designed, developed, tested, and deployed a full-stack web application (farmer-to-buyer marketplace) with crop listings, quality grading, dynamic pricing, and geolocation-based radius search.
- Implemented real-time bidirectional chat using Socket.IO with typing indicators and online presence tracking, gaining hands-on experience in real-time application development and back-end engineering.
- Built a secure JWT-based authentication and session management system with email verification and automated password reset via Nodemailer.
- Integrated an AI-powered assistant via OpenRouter API to handle domain-specific agricultural queries, researching and prototyping emerging AI technology to deliver an innovative software solution.
- Tech Stack:* React.js, Node.js, Express.js, MongoDB, Socket.IO, OpenRouter API, Geolocation API, JWT, Nodemailer

BlueGuard – Android Mobile Safety Application | [GitHub](#)

Aug 2025 – Oct 2025

- Designed and developed an Android mobile application delivering real-time beach hazard alerts and AI-driven suitability forecasts, managing the full mobile app development lifecycle from design to deployment.
- Built a real-time data pipeline integrating the INCOIS API to ingest live ocean data (wave height, current speed, sea conditions), demonstrating data engineering, cloud API integration, and data analytics skills.
- Implemented OpenRouter AI to compute contextual beach suitability scores and safety alerts, prototyping emerging AI technology to deliver an innovative, data-driven mobile solution.
- Collaborated using Agile development practices and applied OOP principles with Android SDK best practices to deliver a responsive, user-friendly mobile interface.
- Tech Stack:* Kotlin, XML, Android SDK, OpenRouter API, INCOIS API, Android Studio

GeeksforCampus – Academic Resource Platform | [Live Site](#)

Jan 2023 – Jul 2023

- Developed and deployed a fully responsive web platform providing academic resources (MCQs, notes, PYQs, question sets) for university students, covering end-to-end web application development and UI/UX design.
- Achieved 5,000+ active users and 1,000+ weekly downloads within the first month of launch, demonstrating strong product impact, UI/UX quality, and consistent user engagement.
- Integrated Google Sheets API for automated, cloud-connected content management and dynamic data reporting, applying cloud automation to streamline platform operations.
- Tech Stack:* HTML5, CSS3, JavaScript, Google Workspace, Google Sheets API

CERTIFICATIONS & ACHIEVEMENTS

300+ Problems Solved on LeetCode & GeeksforGeeks – strong DSA & algorithmic problem-solving

5-Star HackerRank Rating – top performer in coding challenges across multiple programming domains

Frontend Developer (React) Certificate – HackerRank

Software Engineer Intern Certificate – HackerRank

CompTIA Linux+ XKO-005 – Cybrary (Linux OS, system administration, CLI proficiency)

Aug 2023

Sep 2025

Jun 2025

May 2024
